

SUCCESSFUL, QUALITY AGITATION.

Agi Cornell

Consistently bring solids into suspension for removal, mix, and delivery

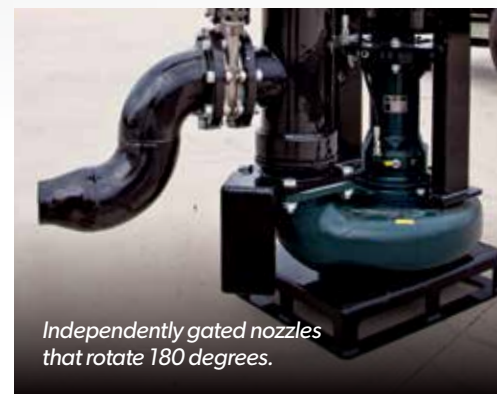

Puck's Agi-Boom is an innovative agitation solution that fits all pits. Effective agitation is crucial to the success of your operation — but with large storing facilities, that can be difficult. Puck crafted the Agi-Boom to combat common agitation issues, with a powerful design that can service barn depths to 13 feet. With a compact design that is fast to transport and easy to maneuver around barns, this Agitation Trailer is manufactured with your operation in mind.

AGI BOOM FEATURES

- ✓ Fits all pits up to 13 feet
- ✓ High pressure blasts bottom solids into suspension
- ✓ Fast to transport, no tractor required
- ✓ Remote gate control system available
- ✓ Doda Chopper pump
- ✓ Accessibility: easy to set-up, easy to move around, or reach under the eave
- ✓ Top load-out port: force-feed, transfer or fill wagons
- ✓ LightSpeed compatible
- ✓ Two (2) independently gated nozzles rotate 180 degrees
- ✓ Hydrostat system transmits more horsepower to the feeder pump for lower fuel requirements
- ✓ 300 feet of 6" hose capacity

Easy leveling and maneuverability around barns.

Independently gated nozzles that rotate 180 degrees.
